Education

Grambling State University Expected May 2028
Bachelor of Science in Computer Science, Minor in Mathematics *Grambling, LA*

- **GPA: 3.95/4.0** | **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Databases, Operating Systems

Technical Skills

Languages: Python, Java, Dart, JavaScript, TypeScript, SQL, C++, C#
Frameworks & Libraries: Flutter, Provider, React, Node.js, .NET, PyTorch, TensorFlow, Scikit-learn, FAISS
Cloud, Testing & Tools: AWS, Docker, Kubernetes, Git, GitHub Actions, JUnit, Linux
Databases: PostgreSQL, MySQL, MongoDB, SQLite

Experience

Bismuth TechHub Aug 2026 – Present
Software Engineer Apprentice

- Design and develop cross-platform mobile applications using **Flutter**, delivering consistent mobile interfaces across platforms.
- Optimize mobile application performance, contributing to a **30% increase in app downloads**.
- Implement application state management with **Provider** and local data persistence with **SQLite** to manage app data across screens and sessions.

HeadStarter Dec 2025 – Mar 2026
Software Engineer Fellow

- Implemented automated unit testing for a **Java** application using **JUnit** and **test-driven development**, improving testing efficiency by **30%**.
- Authored **eight pages** of **Linux** setup and **SVN** documentation, incorporating feedback from **five engineers**.

Grambling State University Sep 2024 – Apr 2025
Machine Learning Student Researcher

- Researched **spatially varying neural networks** under **Professor Bharat Rawal** to build interpretable models for high-dimensional neuroimaging data.
- Implemented **CNN**, **DNN**, and **Vision Transformer** baselines in **Python** and **PyTorch**; tuned convolutional channels, pooling, and dropout to reduce overfitting by **37%**.

Kehilah Global Feb 2024 – Jul 2024
Software Engineer Intern

- Developed **.NET** report-generator features supporting **150,000 reports** annually.
- Led **two interns** in migrating the application from **Visual Basic** to **C#** to support future deployments.
- Built a **JavaScript** web application feature that reduced team workload by **30%**; refined the UI using feedback from **30 users**.

Projects

CITIES Dashboard | *React, Material UI, Google Charts, GitHub Actions*

- Built a dashboard front end delivering air-quality insights to **20K+ students** across schools in Monroe, Louisiana.
- Automated builds and deployment with **GitHub Actions**, reducing release time by approximately **30%**.

Stock Price Prediction (AI4ALL) | *Python, FinBERT, Scikit-learn*

- Built a financial NLP pipeline processing **322K headlines** and **20M stock records**, using **FinBERT** sentiment features to classify stock movements.
- Engineered a **Competitive Pressure Index** measuring negative-news surges relative to baseline coverage; trained a **Random Forest** with **5-fold cross-validation**, achieving **54%** accuracy and outperforming **Logistic Regression**.

Leadership & Awards

Amazon Web Services Student Builder Group Leader, Grambling State University Starts Nov 2026
ColorStack Grambling, Academic Chair Aug 2026 – Present
Lead weekly data structures and algorithms workshops for **90+ members** of the **ColorStack Grambling Community**.
Professional Development: Google Basta Fellow
Awards: 2x Dean's List; **4x Academic Excellence Scholarship**
